Smart Data Platform

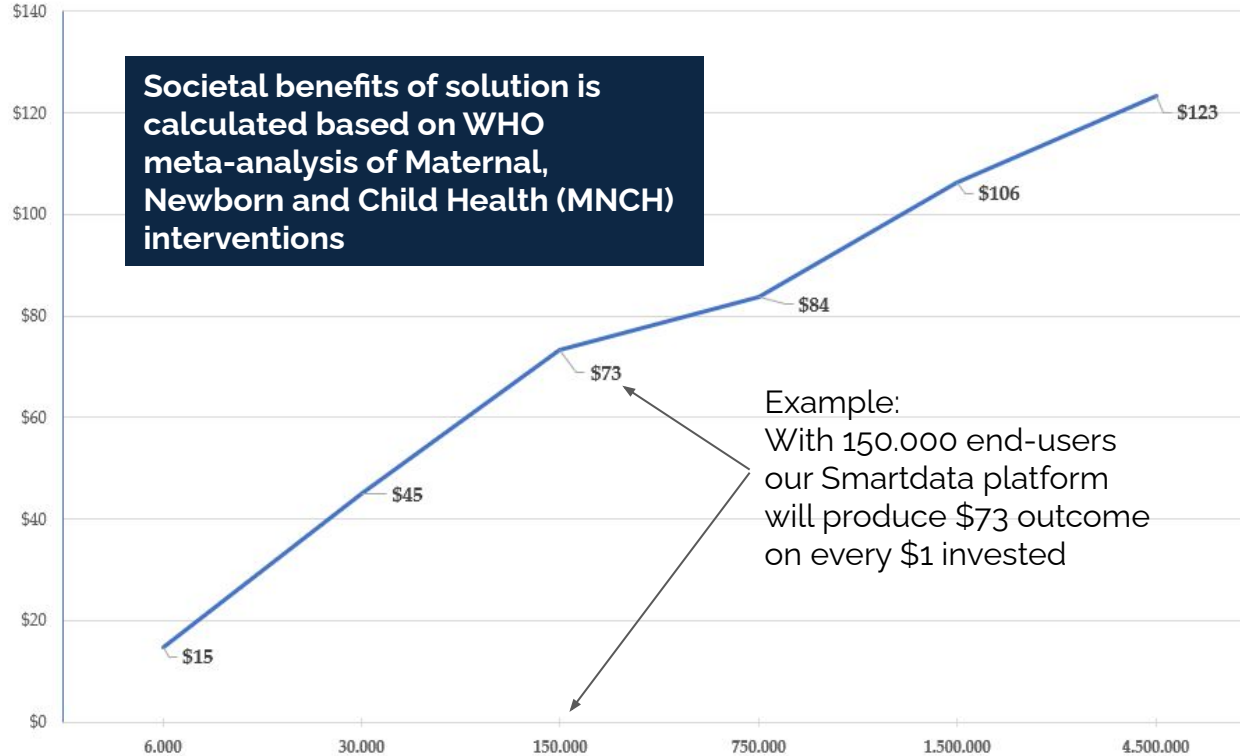

Societal benefits
for all

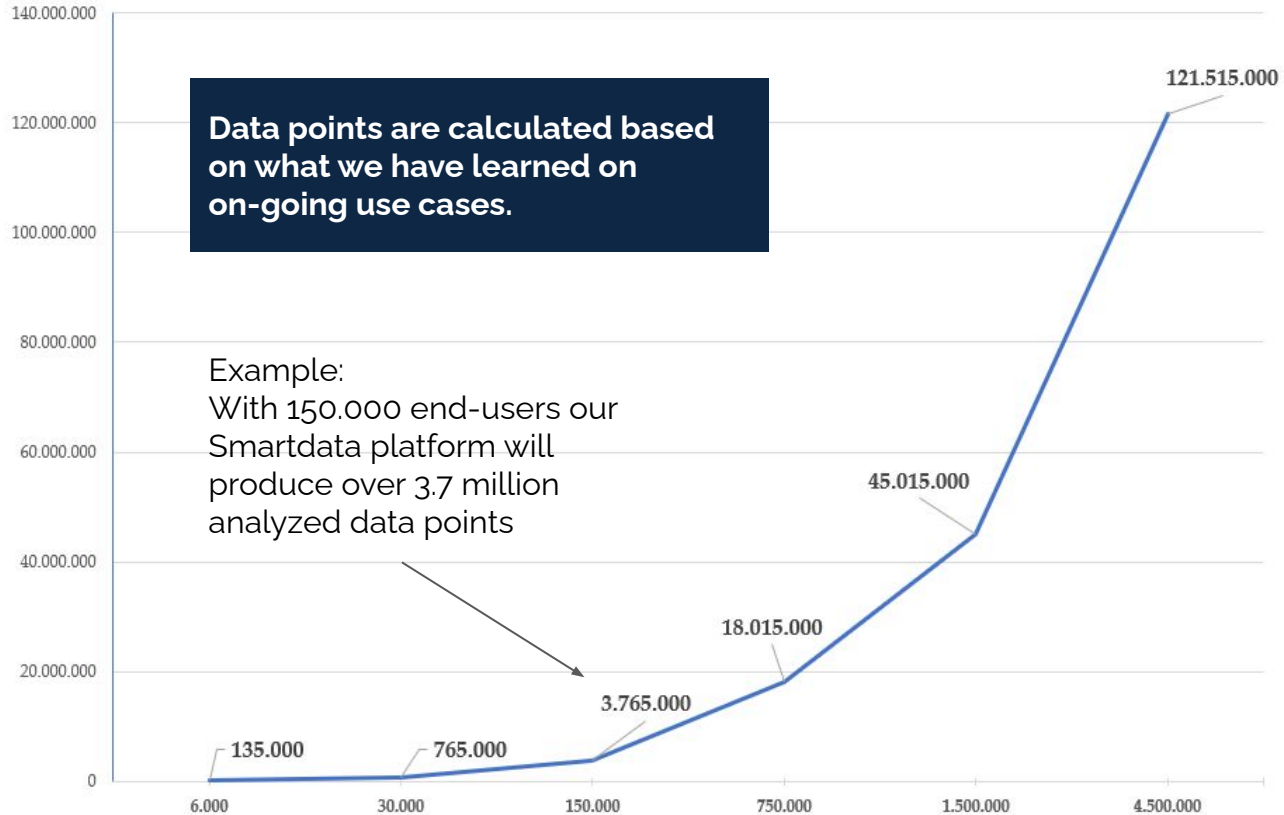

Better health
outcomes precedes
prosperity

Societal benefits of our solution

Return of \$1 Invested Respect to End-Users

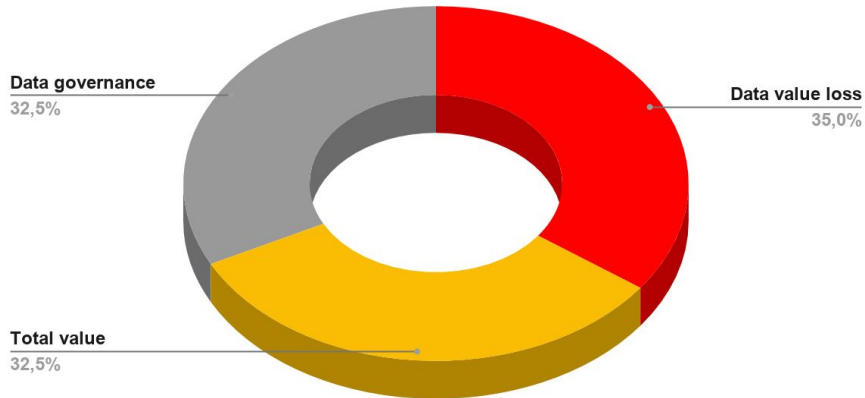

Analyzed Data points = Better functioning societies

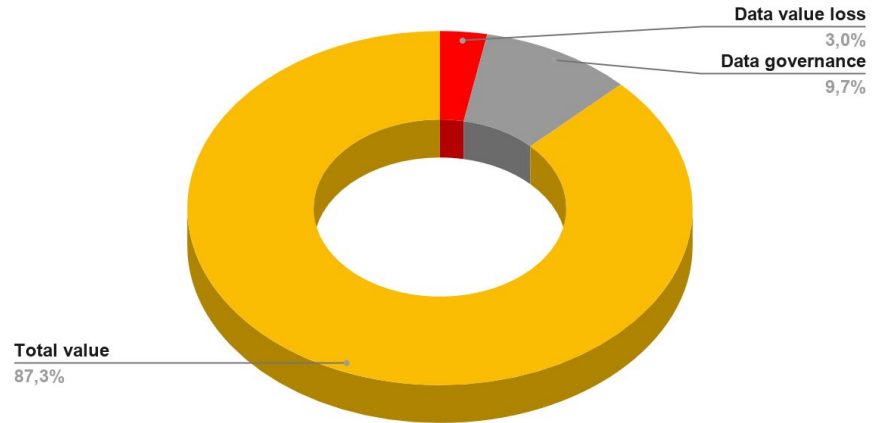

Real-time analytics + data governance = Transparency + value

We demonstrate loss in data governance and we discount “non-synchronous data” -effect out of the fund. It is clear that real-time analytics improves processes and synchronous data governance brings transparency and value.

No systematic analytics + non-synchronous data governance

Real-time analytics + synchronous data governance

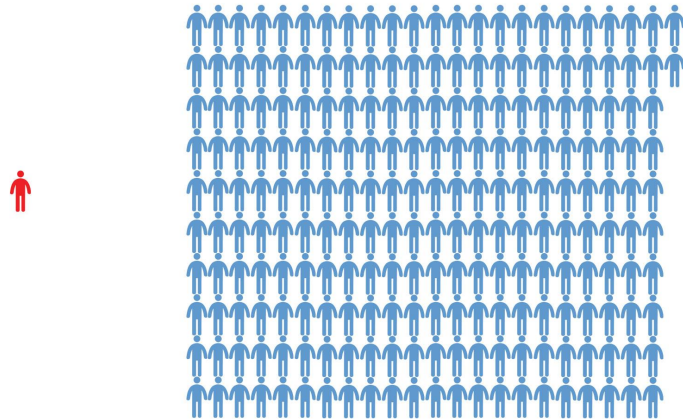

**Data-efficiency plays crucial role impacting
the true scale that can be achieved.**

Operational efficiency - all networks all devices

Comparison made with 1GB of average data plan usage.

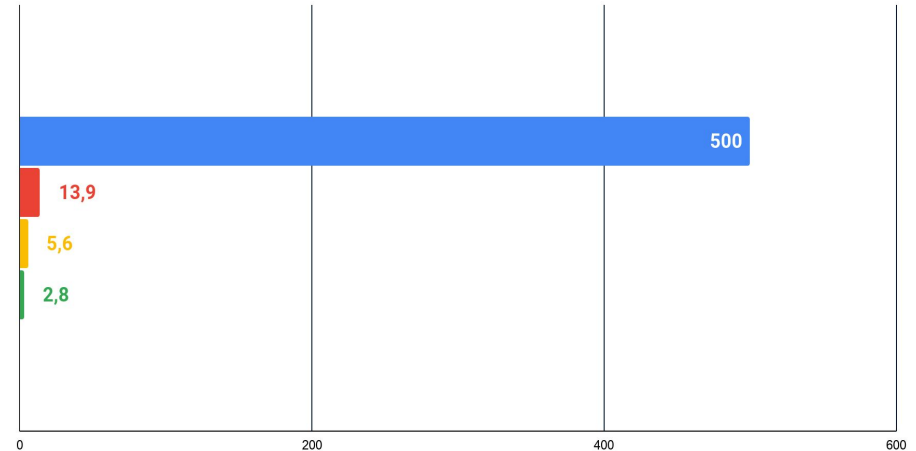

Over 200 persons can use our solution with the same amount of data that 1 person uses on Youtube

67x more data-efficient than usual social media platforms

Hours of use in a month

Strength lies in differences, not in similarities

Testimonials

- "A scalable solution like this is needed and well-received by end-users."
Lead Analyst, INDIA
- "I can already give Neuvo Inc. the highest possible score at this stage. Rarely, if ever, have I seen such an attitude and knowledge."
Project manager, City of TURKU
- "We have a signed Letter of Intent with Neuvo Inc. Global and look forward to continuing to explore ways to collaborate and jointly address global health issues through digital public goods."
Thematic lead in Health, UNTIL

Our technology is flexible and can be quickly pivoted to many different use cases.

Case example:

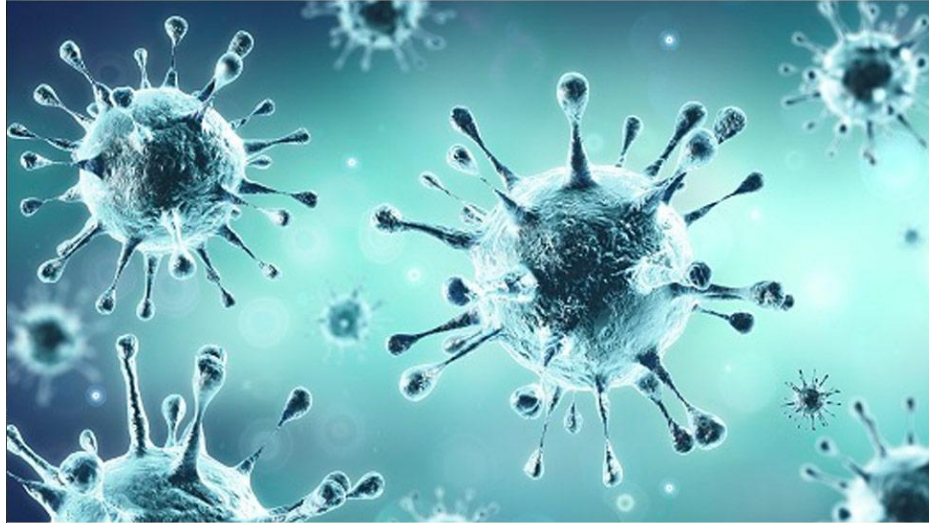

In three weeks we had a fully operational Smart Data solution for COVID-19.

>40 million infections

>1.1m deaths

Health systems collapsing

COVID-19 is impacting the most vulnerable.

Many countries lack vital sustainable information channels to disseminate and serve their citizens.

Rapid Response tools can be implemented in weeks, not in months.

COVID-19 Governance Dashboard - Real-time analytics

Generates new data layers and provides multilingual communication

Multi channel communication simply with just 13 lines of code

COVID-19 solution - Why our clients chose us

Well-known pain points

- How to serve foreign citizens with same speed that native ones and serve unmet needs?
- How to quickly update and maintain truthful information when situation changes rapidly?
- How to distribute localized guidelines timely?
- What are the concerns, what are the impacts?

Our solution

- Automatically usable with over 100 languages
- One entry update system in place
- Localized content system in place
- Synchronous profile-based data pool for better data governance

The next **billion internet users** will come from developing countries and **they** will **need** cost-efficient online services.
